I N T R O D U C T I O N

The data in this publication represents the total research program for Fiscal Year 1975 for the U.S. Department of Agriculture, State Agricultural Experiment Stations, Forestry Schools and Other Cooperating Institutions as reported to the Current Research Information System.

The material has been organized into manageable units and sub-units based on type of research (Agricultural or Forestry), Commodity, and Research Problem Area (RPA) Classification. The various Commodity X RPA Combinations for the two types of research aggregate to 48 Research Programs (RPs) which, in turn, aggregate to seven (7) Research Program Groups (RPGs). Two additional RP/RPGs have been set up to handle administrative and unclassified projects.

For purposes of this publication the research data is handled as either Agricultural or Forestry (Type). All data is considered as agricultural except that performed by Forest Service, Forestry Schools, or funded by McIntire-Stennis. Duplication has been eliminated by designating each unique Type X Commodity X RPA combination as having a primary impact on only one of the 48 RPs. If this same combination also affects or has some bearing on other PRs it is also carried as a secondary/related item on the other RP tables.

For example, an Agricultural Research project concerning watershed protection, Commodity 0300 "Watersheds and River Basins" and RPA 107 "Watershed Protection and Management" is reported as having a primary impact on RP 1.02 "Water and Watersheds." It will also be reported as a secondary/related item under the other Research Program it affects, e.g. RP 2.04 "Forest-Watersheds, Soils, and Pollution." A Forestry Research Project concerning watershed protection Commodity 0300 "Watersheds and River Basins" and RPA 107 "Watershed Protection and Management" is reported as having primary impact on RP 2.04 "Forest Watersheds, Soils, and Pollution" and a secondary/related impact on RP 1.02 "Water and Watersheds." Please note that related/secondary SYS in this publication are shown in parentheses.

The Research Program Key on Pages xv-xxiv shows the Type X Commodity X RPA combinations that aggregate to each RP. Columns 2 and 3 (Agricultural) and 2 and 5 (Forestry) show the combinations which have a primary impact on the Research Programs. Columns 2 and 4 (Agricultural) and 2 and 6 (Forestry) show the combinations which have a related impact (the primary RP for these combinations is shown in parentheses).

The SYS are listed by performing organization except for USDA Contracts, Grants and Cooperative Agreements with organizations other than the State Agricultural Experiment Stations. These SYS are listed by funding organization.
